

STRIKEZONE

A CONSOLE-BASED SHOOTING GAME

Our Team

AISHA NAEEM :

- – TEAM LEAD & LEAD DEVELOPER
- MULTI-BULLET SYSTEM, COLLISION DETECTION, DRONE SPAWNING, ASCII GRAPHICS

SHANZEH AYUB:

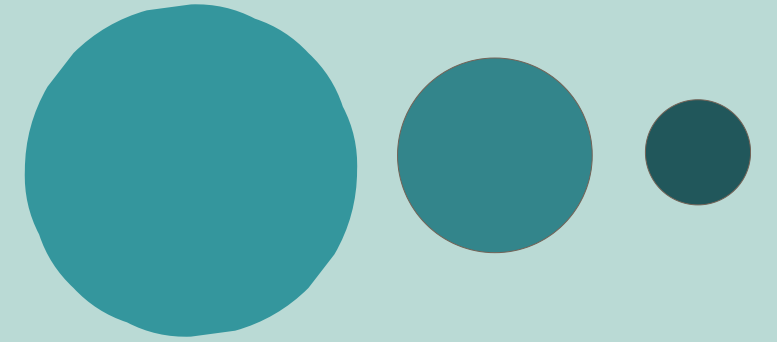

- – GAMEPLAY & LEVEL DESIGN
- LEVEL PROGRESSION, DIFFICULTY BALANCING, STORY SCREENS, MENUS

AIZA AZAD:

- – GAME FLOW & PERFORMANCE
- FRAME-RATE CONTROL, PAUSE MENU, INPUT HANDLING, DOCUMENTATION

PROBLEM

STATEMENT

- Programming learning is often theoretical and non-interactive.
- Console applications lack **engagement** and **real-time mechanics**.
- Students need projects that combine **logic**, interaction, and **fun**.
- There is a need for a console-based project demonstrating:
 - Real-time gameplay
 - Collision detection
 - User input handling
 - Without using graphics libraries.

MODULES

- Core Game Engine & Loop Management
 - Multi-Entity Management System
 - Real-Time Input & Player Control
- Collision Detection & Combat System
- Graphics & Display Management
- Story, Menus & Player Experience

```
=====
                        STRIKEZONE
=====

The year is 2157.
Hostile alien drones have entered our orbit.
You are humanity's last line of defense.

As the planetary defense pilot, you must
eliminate all threats and save Earth.

The fate of billions rests in your hands.
